PROFESSIONAL SUMMARY

A Computer Engineering student at King Fahad University of Petroleum and Minerals (KFUPM) with a strong interest in Artificial Intelligence, Data Science, and Machine Learning. Recognized among the TOP 20 Preparatory year students and awarded six academic honors. Developed AI-driven and data-centric projects using Python, including predictive maintenance on SCADA data and monitoring dashboards using Power BI. Looking for a Summer Training opportunity to apply AI and software engineering skills in solving real-world industrial and technology challenges.

EDUCATION

King Fahd University of Petroleum and Minerals (KFUPM)

B.Sc Computer Engineering | Expected Graduation: May 2028

- **Cumulative GPA : 3.537/4.00**
- **Honors:** Awarded 1st, 2nd, and 3rd Academic Honors across six consecutive semesters; **TOP 20** student in the preparatory Year.
- **Relevant Coursework:** Artificial Intelligence, Data Science, Data & Computer Communications, OOP, and Digital Logic Design

PROJECTS

SmartGrid Predictive Analytics

- Developed a predictive maintenance model for wind turbine gearbox health using Python and LightGBM.
- Processed 250,000+ time-series SCADA records to predict equipment condition.
- Achieved an R^2 score of 0.9857, demonstrating high prediction accuracy for industrial asset monitoring.

Cloud Server Performance Monitor

- Built a Python-based monitoring tool to collect real-time CPU and RAM utilization metrics.
- Designed an interactive Power BI dashboard for trend analysis, anomaly detection, and early warning visualization.
- Automated performance data collection to support system monitoring and operational insights.

Smart Pedestrian Crossing System

- Designed and implemented an FPGA-based smart pedestrian crossing system using Verilog and Xilinx.
- Developed priority-based traffic control logic with real-time countdown functionality.
- Collaborated in a two-member team, leading the hardware design and Verilog implementation.

Personal Portfolio Website

- Designed, built, and deployed a responsive portfolio site using Next.js, TypeScript, and Tailwind CSS, with Git/GitHub version control and continuous deployment via Vercel.

LEADERSHIP & ACTIVITIES

Preparatory Year Mentor (KFUPM): Mentored around 100 Preparatory Year students by providing academic guidance and support.

Student Mentor: Provided one-to-one academic mentoring to help students improve their English language skills and course performance.

Volunteer in Women in Data Science (WiDS): Supported workshop operations and participant engagement during university data science events.

CERTIFICATIONS

- **Introduction to Artificial Intelligence (40 Hours) – KAUST Academy**
- **SAMAI Program – Saudi Data & AI Authority (SDAIA)**
- **Introduction to Data Science in Python – University of Michigan (Coursera)**
- **Linear Algebra for Machine Learning and Data Science – DeepLearning.AI (Coursera)**

TECHNICAL SKILLS

- **Programming:** Python, Java, C, MATLAB, VERILOG
- **Machine Learning:** Scikit-learn, TensorFlow, Supervised Learning, Time-Series Analysis
- **Data Analysis:** Pandas, NumPy, SQL, Power BI (DAX, Power Query), Matplotlib
- **Developer Tools:** Git, GitHub, VS Code, IntelliJ IDEA, Jupyter Notebook, Google Colab, Xilinx Vivado
- **Web Development:** Next.js, React, TypeScript, Tailwind CSS, Vercel
